TO: WORKFORCE DEVELOPMENT COMMUNITY

SUBJECT: REVISION TO JTA SYSTEM VERSION 4.24 RELEASE

The Job Training Automation (JTA) Version 4.24 Release has been updated since the last information bulletin, WIAB02-58.   This release excludes the following log numbers: #5634 PWIB (Print WIA Base Wage Report), #5682 LWIA (Load Workforce Investment Application), #5655 LWID (Load WIA Individual Participant Data), #5692 PSED (Print WIA ETPL SED Status Report), #5643 PWCAR (Print WIA Client Action Report). We anticipate inclusion of log #5634 and #5655 in the next JTA system release. A detailed description of the new release changes is attached.

Should you have any questions regarding the changes made to the JTA system release, please call the JTA Help Desk at (916) 653-0202.

/S/ BOB HERMSMEIER
    Chief
    Workforce Investment Division

WORKFORCE INVESTMENT ACT (WIA) RELEASE NOTES

LOCAL WORKFORCE INVESTMENT BOARD RELEASE 4.24

WIA System

Programs Modified:

Log # 5616   EECS (Enter Employer Customer Satisfaction Data)

Modified program to fix the display problem on the "service date field".

Log # 5627   EWIF (Enter WIA Follow-up Form)
**   LWIF (Load WIA Follow-Up Form)**

Changed follow-up date calculation to use the end of the exit quarter instead of the exit date and to not add the number of days but to add the number of quarters and use the first day of the following quarter. The follow-up date will always be 10/01/YYYY, 01/01/YYYY, 04/01/YYYY, 07/01/YYYY. (i.e For exit_dt = 10/05/2002, for the first quarter after exit (wia_folup_type 3) the program would use 12/31/2002, add 1 qtr, and set the folup_dt = 04/01/2003) This will not apply to wia_folup_type 1 or 2   (those calculations remain the same). Supp_data_empstat1 will only be required for wia_folup_type = 3, else skip. Supp_data_empstat2 will only be required for wia_folup_type = 5, else skip.

Log # 5617, 5622, 5651, 5641, 5673

**   EWIR (Enter WIA Enrollment Form)**
**   LWIR (Load WIA Application Form)**

Modified the program to fix the cursor movement problem on the test box.

Fixed program to allow 9 = N/A as valid value to basic_skill_defcnt, ofndr, preg_parent_yth, yth_need_addtl, runaway, foster_child, and homeless in entry screen and load file.

Added "Universal Access Only" field after SSN, defaults to 2 and it is a required field.

Fixed numbering on the last page.

Log # 5626, 5658, 5683   EWIT (Enter WIA Exit Form)
LWIT (Load WIA Exit Form)

Modified program to allow value 9 = N/A as a valid value for wia_trng_reltd. If 9 entered, then skip determination method field.

Added a field after Exit Staff ID, "Update Client Info?" defaulting to N, valid values Y/N. If Y, then call EWIR to update data (EWIT only).

Modified the program so dt_empld is not a required field.

Fixed program to edit placement job code properly.

Log # 5498   LRCS (Load Employer Customer Satisfaction Data)

Created new screen to load Employer Customer Satisfaction Data into the JTA system.

Log # 5604   PETP (Print WIA Eligible Training Provider Lists)

Modified program to fix problem with temp tables on the test box.

Log # 5660   PLWPD (Print Local WIA Performance Detail Report)

Changed to allow rept_type = A for end period 03,06,09,12.

Log # 5662   PLWPS (Print Local WIA Performance Standards
Report)

Changed to allow rept_type = A for end period 03,06,09,12.

Log # 5661   PLWPO (Print Local WIA Performance Outcomes Report)

Changed to allow rept_type = A for end period 03,06,09,12.

Log # 5663   PLWRS (Print Local WIA Performance Roster)

Changed to allow rept_type = A for end period 03,06,09,12.

Log # 5664   PLAAM (Print Local WIA Additional Annual Performance Measures Report)

Changed to allow rept_type = A for end period 03,06,09,12.

Log # 5657, 5669   PWIB (Print WIA Base Wage Report)

Added option "Print Universal Access Clients Only", default to N, and this field is required. If Print Universal Access Clients Only = Y, then only retrieve records where app_type = "U". All other processing should exclude app_type = "U".

For Exiters Found/Not Found, only supp_data_empstat1 = '1'or '2' or supp_data_empstat2 = '1' or '2' should be used to determine FOUND. This means that if either of the fields = '3' then it is still NOT FOUND. The values of '3' will continue to display on the report.

Log # 5623, 5652   PWIR (Print WIA Registration Form)

Allow to print value 9 = N/A (not applicable) for basic_skill_defcnt, ofndr, preg_parent_yth, yth_need_addtl, runaway, foster_child, and homeless.

Added "Universal Access Only" field after SSN. Display YES for 1 and NO for 2.

Log # 5633, 5629   PWIS (Print WIA Status Roster)

Added agency indicator: (A)pp, (C)ase, Acti(V)ity, or E(X)it to the option screen, default to A. If agency level = A, then use wia_app.wia_agcy_cd. If agency level = C, then use wia_case.wia_agcy_cd. If agency level = V, then use wia_actvy.wia_agcy_cd. If agency level = X, then use wia_exit.wia_agcy_cd.

If exit_dt does not fall within the report begin and end dates, then do not display the exit_dt or wia_exit_cds or count in the total.

If dt_empld does not fall within the report begin and end_dts, then do not display the dt_empld, hrly_wg, or hrs_wk or count total.

On report summary, changed "terminated" to "exited".

Expanded the youth column to display the suffix "-IN" for wia_educ_stat = 1, 2 or 5 or "-OUT" for wia_educ_stat = 3 or 4 after the Y or O for youth.

Prefix the goal code with "P" for primary or "N" for Not primary using the wia_goal. primary_goal field.

Log # 5635   PWSL (Print WIA Selective Service Listing)

Added agency indicator: (A)pp, (C)ase, Acti(V)ity to the option screen, default to C. If agency level = A, then use wia_app.wia_agcy_cd. If agency level = C, then use wia_case.wia_agcy_cd. If agency level = V, then use wia_actvy.wia_agcy_cd.

Log # 5598   PWSR (Print WtW Status Roster)

Modified report so clients that had been terminated prior to the report period begin date do not show up in the printed report.

Log # 5631, 5699, 5659, 5688

XLWPR (Extract and Calculate WIA Performance)

Changed YSA calculation to check for break in service.

If (wia_ipd_goal.dt_attain is > wia_ipd_goal.dt_set plus 1 year) and (wia_ipd_goal.dt_set plus 1 year is within the report period and the result code is NOT NULL) then include in the denominator. Change to add 4 quarters to wia_ipd_goal.dt_set instead of 5 quarters when checking for goals due but not met. Program excludes exit codes 10, 12, 13 and 18 if client exited before wia_ipd_goal.dt_attain and result code does not = "1".

Changed to allow Annual runs for end_prd 03,06,09,12. Changed the annual YDE calculation to look at exiters in current program year up to the end period.

Fixed YDE to exclude exit code 16 from the denominator if degree type 1 or 2 not found.

Log # 5628, 5653   XWID (Extract WIA Data)

Modified program to allow value 9=N/A as a valid value for basic_skill_defcnt, ofndr,preg_parent_yth, yth_need_addtl, runaway, foster_child, and homeless in the wia_app table. Allow value 9=N/A as a valid value for wia_exit.wia_trng_reltd.

Changed prompt to create extract file to prompt before running the extract so program is not waiting for user response. "If no errors found, create extract file (Y/N)?"

Added "Create file for Universal Access" to option screen, default to N, Required. If above field = Y, then create file "UNIV_SDA_YYYYMM.xtr" with subgrnte_cd, wia_app_num, app_type, ssn, and app_dt. All records from the wia_app table with univ_access = "1" will be retrieved. This data will be sent to LMID for base wage data which will be returned to the LWIAs.

Log # 5680   LWIG (Load Workforce Investment Goals)

Changed to allow the same goal to be entered again if previous goals with the same goal code are closed.

Scripts

A script will be run to update the JTA version.
A script will be run to add LRCS to menu/access levels.
A script will be run to set new field univ_access = "2" for all existing records.
A script will be run to update follow-up table

Database Changes

Added univ_access_only, char(1) to the wia_app table after the ssn field.

Deleted columns dt_post_educ and dt_adv_trng from wia_ipd_app, wia_ipd_app_01, wia_exit, wia_folup, wia_ipd_folup, and wia_ipd_folup_01.
